

AttnLRP 0  1

Prompt: Class ify the radiology impression : Chest CT shows
no evidence of pulmonary embolism ; lungs otherwise clear .

Generated: *This radiology impression is **Negative/Normal**.
Here's a breakdown: * **"No evidence of pulmonary embolism"**:
This is the key finding and indicates the absence of a blood clot in
the lungs, which is what the CT was primarily looking for. *
"Lungs otherwise clear": This reinforces the normal findings,
stating that there are no other significant abnormalities detected in
the lungs. **Overall, the report suggests a healthy and unremarkable
chest.***
