

AttnLRP 0  0.37

Prompt: Simplify and state whether the result is positive : The expression evaluates to -3 multiplied by negative four .

Generated: *The expression is -3 multiplied by -4 . We can write this as $-3 \times (-4)$. When we multiply two negative numbers, the result is positive. So, $-3 \times (-4) = 3 \times 4 = 12$. The result is 12. Since 12 is greater than 0, the result is positive. Final Answer: The final answer is $\boxed{12}$*
