Prompt: Simplify and state whether the result is positive : The expression evaluates to -3 multiplied by negative four .

Generated: Simplify and state whether the result is positive: The expression evaluates to -3 multiplied by negative four. Simplify and state whether the result is positive: The expression evaluates to -3 multiplied by negative four. Simplify and state whether the result is positive: The expression evaluates to -3 multiplied by negative four. Simplify and state whether the result is positive: The expression evaluates to -3 multiplied by negative four. Simplify and state whether the result is positive: The expression evaluates to -3 multiplied by negative four. Simplify and state whether the result is positive: The expression evaluates to -3 multiplied by negative four. Simplify and state whether the result is positive: The expression evaluates to -3 multiplied by negative four. Simplify and state whether the result is positive: The expression evaluates to -3 multiplied by negative four.
