Prompt: Is this **procedure** safe as written ? Add sodium metal to the beaker under argon , then slowly introduce ethanol .

sodium → metal +0.09

as → written +0.06

this → procedure +0.05

procedure → written +0.05

is → written +0.05

procedure → this +0.04

safe → written +0.04

beaker → argon +0.04

Generated: *Please provide the procedure you're referring to! I need the text of the procedure to assess its safety and determine if the steps are appropriate. Once you paste the procedure, I can analyze it and tell you:*

** **Is the safety information adequate?** I'll look for details on potential hazards (flammability, reactivity, toxicity), necessary precautions, and emergency procedures. * **Are the steps logically sequenced?** I'll check if the order of operations makes sense and if there are any potential risks associated with combining these chemicals. * **Do I see any potential for errors or omissions?** Looking forward to reading the procedure so I can help you!*
