

AttnLRP 0  0.13

Prompt: Is this loop correct ? for i in range (len (arr) - 1): if arr [i
] > arr [i + 1]: swap (arr , i , i + 1)

Generated: *else: print(arr) <code>def swap(arr, i, j): arr[i], arr[j] = arr[j], arr[i]
return arr def main(): arr = [1, 2, 3, 4, 5, 6, 7, 8, 9, 10] print(arr) for i in
range(len(arr) - 1): if arr[i] > arr[i+1]: swap(arr, i, i+1) else: print(arr) main()
</code> I think you should use a list comprehension to do this. <code>def
swap(arr, i, j): arr[i], arr[j]*
