Prompt: Simplify and state whether the result is positive : The expression evaluates to − 3 multiplied by negative four .
Generated: Simplify and state whether the result is positive: The expression evaluates to 10 multiplied by negative 10. Simplify and state whether the result is positive: The expression evaluates to 10 multiplied by negative 10. Simplify and state whether the result is positive: The expression evaluates to 10 multiplied by negative 10. Simplify and state whether the result is positive: The expression evaluates to 10 multiplied by negative 10. Simplify and state whether the result is positive: The expression evaluates to 10 multiplied by negative 10. Simplify and state whether the result is positive: The expression evaluates to 10 multiplied by negative 10. Simplify and state whether the result is positive: The expression evaluates to 10 multiplied by negative 10. Simplify and state whether the result
state → whether +0.08
and → simplify +0.07
and → state +0.05
simplify → state +0.05
whether → state +0.05
by → multiplied +0.04
state → simplify +0.04
to → evaluates +0.04
