Prompt: Extract the strength of the claim : These results suggest ,
but do not establish , a causal link between sleep duration and
memory consolidation .

Generated: *The strength of the claim is **weak**. Here's why: *
"Suggest" indicates a possibility, not a certainty. It implies the data
hints at a connection, but doesn't prove it. * **"Do not establish"** is a
direct disclaimer against claiming a proven causal relationship. This is a
crucial phrase that significantly weakens the claim. Essentially, the
statement is saying there's a potential connection worth investigating
further, but the current*

extract → claim +0.15

results → suggest +0.15

the → claim +0.13

strength → extract +0.13

causal → link +0.13

sleep → duration +0.12

strength → the +0.12

claim → the +0.11
