

AttnLRP 0  0.56

Prompt: Is this loop correct ? for i in range (len (arr) - 1): if arr
[i] > arr [i + 1]: swap (arr , i , i + 1)

Generated: *The loop you provided is a single pass of a **bubble sort** algorithm. It's **not complete** to fully sort an array, but it is **correct** for one pass of the algorithm. Here's a breakdown: * **`for i in range(len(arr) - 1):`**: This loop iterates through the array from the first element (index 0) up to the second-to-last element (index `len(arr)*

Meta-AttnLRP

arr → arr -0.20

this → loop +0.16

arr → arr -0.12

loop → this +0.11

loop → correct +0.11

in → range +0.11

arr → arr -0.10

(→ arr +0.10
