

AttnLRP 0  1.6

Prompt: Class ify the radiology impression : Chest CT shows
no evidence of pulmonary embolism ; lungs otherwise clear .

Generated: *This radiology impression is classified as
Negative/Normal. Here's a breakdown: * **No evidence of
pulmonary embolism:** This is a key negative finding, ruling out a
serious and often life-threatening condition. * **Lungs otherwise
clear:** This indicates no other significant abnormalities were
detected in the lungs (no pneumonia, masses, etc.). Essentially, the
radiologist is stating the CT scan did *not* find anything concerning.
It's a reassuring result.*
