

AttnLRP 0  1

Meta-AttnLRP

Prompt: Class ify the radiology impression : Chest CT shows
no evidence of pulmonary embolism ; lungs otherwise clear .

Generated: *Here's a classification of the radiology impression:*

***Category:** Negative Findings **Specific Classification:** **

***Negative for Pulmonary Embolism (PE):** This is the primary
finding – the scan ruled out a blood clot in the lungs. * **Lungs*

*Otherwise Clear:** This indicates that there were no other
significant abnormalities detected in the lung tissue itself (e.g.,
pneumonia, masses, consolidations). **Overall Impression:** A
clean negative CT scan of the chest. **Level of Detail:** This is a
fairly detailed and specific impression, providing both the negative
finding and a description of the overall appearance of the lungs. ---*

*Would you like me to: * Suggest a potential ICD-10 code for this
impression? * Help you draft a corresponding note for a physician?*
