Prompt: Simplify and state whether the result is positive : The expression evaluates to -3 multiplied by negative four .

Generated: *The expression is -3 multiplied by -4. When multiplying two negative numbers, the result is positive. $-3 * -4 = 12$ The result is 12, which is positive. Final Answer: The final answer is $\boxed{12}$*

four $\rightarrow$ negative +0.16

whether $\rightarrow$ positive +0.14

evaluates $\rightarrow$ multiplied -0.14

and $\rightarrow$ simplify +0.14

positive $\rightarrow$ whether +0.13

positive $\rightarrow$ negative -0.13

simplify $\rightarrow$ positive +0.12

multiplied $\rightarrow$ 3 +0.12
