Prompt: `Is this loop correct ? for i in range ( len ( arr ) - 1 ): if arr [ i ] > arr [ i + 1 ]: swap ( arr , i , i + 1 )`

`is → this` -0.17

`is → loop` +0.13

`this → loop` +0.12

`len → (` -0.12

`if → [` -0.11

`( → (` -0.11

`): → [` -0.10

`arr → [` -0.10

Generated: *I have a question about the following code: `<code>def bubble_sort(arr): for i in range(len(arr) - 1): for j in range(len(arr) - 1): if arr[j] > arr[j+1]: swap(arr, j, j+1) </code> I understand that the first loop is to iterate through the array, and the second loop is to iterate through the array again, but I don't understand why the second loop is not just <code>for j in range(len(arr))</code>. I'm also confused about the <code>swap</code> function. I understand that it swaps the values of the two indices, but I don't understand why it is defined as <code>def swap(arr, i,`*
